PROFILE

A motivated and detail-oriented graduate in Management Information Systems. Strong foundation in business analysis, SRS documentation, and project development. Highly interested in exploring AI technologies, especially CNN algorithms, with the goal of applying them in the healthcare field.

WORK EXPERIENCE

Intern at D-soft

- Collaborated with the BA team to review and update SRS documentation.
 - Conducted preliminary business requirement analysis for enterprise clients.
 - Supported the development team by creating demo app features.
 - Researched and applied basic AI algorithms in small-scale prototypes.
-

EDUCATION

Duy Tan University

- Bachelor's Degree in Management Information Systems (GPA: 3.2)
- Key Courses: Business Analysis, Software Engineering, Database Systems, Project Management
- Academic Achievements:
 - Participant in ICPC 2024 competition (team-based algorithm problem-solving).
 - Capstone Project: AI-powered Body Measurement App Prototype (using CNN concepts for body shape analysis).

Certifications

- IELTS 7.5 – English Proficiency
 - JLPT N4 – Japanese Language
-

SKILL

- Proficient in using **HTML** to build and customize simple web interfaces.
 - Experienced in preparing and maintaining **SRS documentation** for software projects.
 - Knowledgeable in **Agile project management**, including sprint planning and task tracking.
 - Capable of designing and implementing project **UI demos** to visualize requirements.
 - Basic understanding of **AI algorithms**, with a particular interest in **CNN applications**.
-

INTERESTS

- Exploring **AI applications** (especially **CNN algorithms**) in real-world solutions
 - Applying AI technologies in **healthcare** to improve diagnostics and treatment support
 - Following **business trends** in IT and digital transformation
 - Participating in problem-solving **competitions** and **tech challenges** (e.g., ICPC)
